Education

California State University - Fullerton

August 2020 – Present

Bachelor of Science in Computer Science, Minor in Business Administration

Fullerton, CA

Relevant Coursework

- Data Structures
- Intro to Game Production
- Object-Oriented Programming
- Cybersecurity Principles
- Web Security
- Microsoft Security
- Computer Networking
- Linear Algebra and Graph Theory
- Discrete Mathematics

Experience

Textile Products Inc.

August 2023 – February 2024

IT Specialist Intern

Anaheim, CA

- Configured network switches and ports using PuTTY to set up 802.1x authentication, securing both wired and wireless network access for over 50 employees, enhancing the network security by 30%.
- Provided comprehensive support for user queries, resolving over 90% of hardware and software issues within 24 hours through a ticketing system. This minimized employee downtime and improved overall user satisfaction by 25%, contributing to smoother daily operations.
- Managed the deployment of software updates and patches, ensuring 100% of systems were consistently up-to-date with the latest security and performance improvements. This reduced potential security vulnerabilities by 40% and optimized system performance, leading to fewer technical disruptions.
- Assisted the system administrator in creating a procedure manual for onboarding new employees, reducing onboarding time by 20%. This streamlined IT processes, accelerating the integration of new hires and improving operational efficiency across departments.

Cybersecurity Bootcamp

September 2022 – July 2023

Cybersecurity Trainee

Long Beach, CA

- Configured and optimized network devices, troubleshooting connectivity issues and ensuring security, with experience across both wired and wireless networks.
- Secured Microsoft Windows environments by deploying tools such as Microsoft Defender, BitLocker, and Windows Firewall, alongside scripting automation for enhanced protection.
- Participated in real-world simulations to develop incident response strategies, enhancing the ability to handle cybersecurity threats in dynamic environments.
- Conducted hands-on penetration testing and vulnerability assessments using tools such as Metasploit and Nmap to identify and mitigate security threats.

Projects

Space Invaders (Recreation) | Python

October 2024

- Developed a fully functioning Space Invaders game using Python and the Pygame library, focusing on replicating classic gameplay mechanics.
- Implemented alien animations using alternating frames to create dynamic movement, enhancing visual engagement.
- Utilized object-oriented programming (OOP) principles to structure key game elements, including player movement, laser firing, alien behaviors, and obstacles.
- Applied event handling and game state management to ensure smooth transitions between game states, such as launch menu and high score displays.
- Designed and integrated a start screen featuring responsive buttons ('Play' and 'High Score'), improving user interaction and flow.

Personal Portfolio Website | HTML/CSS, Javascript

August 2024

- Designed and developed a personal portfolio website using HTML, CSS, and JavaScript to showcase projects and professional experiences.
- Integrated interactive features such as dynamic tabs for skills, experience, and education sections, allowing users to easily navigate and view content.
- Connected contact form to Google Sheets API for automated message handling, streamlining communication with potential employers and collaborators.

Technical Skills

Languages: Python, C++, HTML/CSS

Developer Tools: VS Code, PuTTY, Git, Wireshark, Cisco Packet Tracer

Technologies: Linux, GitHub, Office 365, Jira
